

## SERIES 2270V/2280V

# HIGH PRECISION REACTION TORQUEMETERS HAVE ANALOG AND DIGITAL OUTPUTS

The Best Performance of Any Similar Flanged Reaction  
Torquemeter, Torque Sensor, or Torque Transducer

- 10 lbf-in to 100,000 lbf-in Ranges (2270V) (1.13 to 11,300 N-m)
- 10 lbf-in to 750,000 lbf-in Ranges (2280V) (1.13 to 84,700 N-m)
- 200% (2X) Overload Rating
- 150% Overrange Rating
- 0.05% Combined Nonlinearity & Hysteresis
- No Bearings, No Speed Limit
- Remote Bi-directional Shunt Calibration
- RS232 Communication
- PC Interface Software Included
- 0 to ±10.000 Volt Analog
- 11 Bessel Response Data Filters
- No Manual Adjustments
- NIST Traceable\* Bi-directional Calibration

Series 2270V/2280V Torquemeters have high accuracy, high torsional stiffness, and low deflection. Overload capacity is twice rated torque. All are calibrated CW and CCW to rated load in our NVLAP\* accredited laboratory. There are no pots or other parts subject to misadjustment during vibration or by unauthorized users. You can select any of 10 units of Measure without recalibrating.

Analog and digital outputs are simultaneously available. Use the RS232 port with furnished software or write your own. The Torquemeter has low drift, exceptional temperature performance, and 150% Overrange. Without High Overrange, clipped peaks cause large errors\*\*.

Calibration, Tare and Zero may be invoked via control lines or your computer. Use any of 11 Bessel filters for signal processing. Use your PC to *Display Current, Max, Min and Spread Data, to Save and Plot Data and to Store Test Settings.*

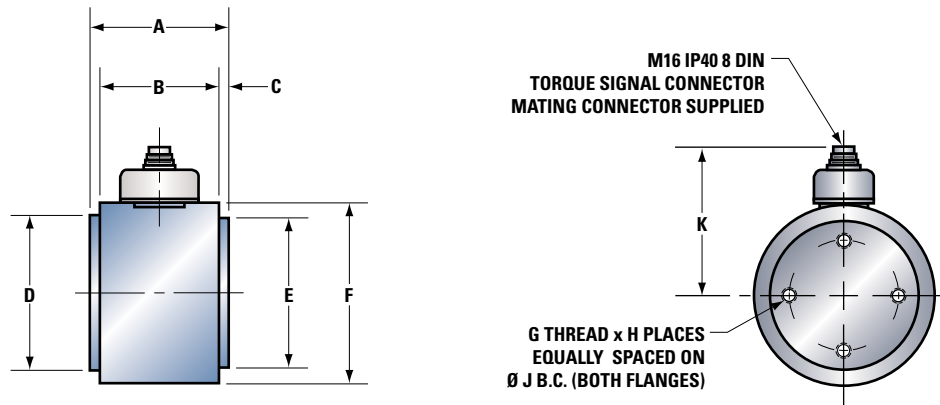

The Model 703 or 733 displays one or two channels of torque respectively. See Bulletin 374.

## Specification Notes

1. May be re-set, via com port, to any value between 1 and 10 volts.
2. Based on best fit line; see Technical Memorandum 230104.
3. Invoke bi-directional Cal via the com port.
4. Clear Tare via com port; see Note 7.
5. Invoke Tare function is also available via com port.
6. Invoke Zero via com port or ground both pins 1 & 6.
7. Cycling Power Off/On Clears Tare and Resets Max/Min's.
8. Analog outputs are short circuit protected.
9. Specifications are subject to change without notice.

## Series 2270/2280

<b>Available Cables</b>	Cable lengths (XX) are 20, 50 and 100 feet. If sold without cables, a mating connector is supplied.
<b>P/N 224-8636-XX 2270V/2280V to Model 703</b>	Powers Torquemeter, Displays torque, Implements Model 703 functions including Remote Cal. Zero, etc.
<b>P/N 224-8840-XX 2270V/2280V to RS232 + C/F DAQ</b>	Connects Torquemeter to Host. 6 unterminated lines for C/F Power & DAQ. 50 feet max. length.
<b>P/N 224-8841-XX 2270V/2280V to PC RS232 &amp; 703</b>	Connects Torquemeter to Host Port. Powers 2280V, displays Torque and implements all 703 functions. 50 feet maximum length.
